Professional Summary

Entry-Level Data Scientist with hands-on experience in Machine Learning, Predictive Analytics, Statistical Analysis, Python, SQL, Pandas, Scikit-learn, Power BI, and Data Visualization. Experienced in data preprocessing, feature engineering, exploratory data analysis (EDA), model development, model evaluation, and business intelligence to solve real-world problems. Built machine learning and analytics solutions processing 650,000+ records, developed predictive models, automated data pipelines, and delivered actionable insights through interactive dashboards. Strong foundation in statistics, database management, ETL, data modeling, predictive modeling, and data-driven decision-making.

Technical Skills

Programming Languages: Python, SQL, R

Data Science: Pandas, NumPy, Data Preprocessing, Data Cleaning, Data Wrangling, Data Transformation, Exploratory Data Analysis (EDA), Statistical Analysis, Descriptive Statistics, Hypothesis Testing, Feature Engineering, Feature Selection, Data Validation, Data Profiling, Outlier Detection

Machine Learning: Scikit-learn, Predictive Modeling, Regression, Classification, Model Development, Model Evaluation, Supervised Learning, Unsupervised Learning, Cross-Validation, Hyperparameter Tuning, Linear Regression, Logistic Regression, Decision Trees, Random Forest, K-Means Clustering, Model Selection, Feature Scaling

Business Intelligence: Power BI, Tableau, Microsoft Excel, Power Query, DAX, Data Modeling, KPI Reporting, Dashboard Development, Business Analytics

Data Visualization: Matplotlib, Interactive Dashboards, Drill-Down Analysis, Trend Analysis, Data Storytelling

Databases: MySQL, SQLite, MongoDB

SQL: Joins, CTEs, Window Functions, Subqueries, Stored Procedures, Views, Indexes, Aggregate Functions, Query Optimization

Developer Tools: Git, GitHub, VS Code, Docker, Jupyter Notebook

Data Engineering: ETL, Data Pipelines, Data Warehousing, Data Integration, Data Governance, Data Quality, Reporting Automation, Decision Support

Experience

Data Analyst | Python Developer | AI Haseena Exports Pvt. Ltd.

Dec 2025 – Apr 2026

LogiSense 360 – Predictive Logistics Analytics Platform

Python | Flask | Scikit-learn | SQLite | MongoDB

- **Developed** an end-to-end predictive logistics analytics platform using **Python, Flask, Scikit-learn, SQLite, and MongoDB** to **forecast** shipment delays, identify spoilage risks, automate shipment monitoring, and support real-time operational **decision-making**.
- **Processed** and analyzed historical logistics datasets by performing **data preprocessing, feature engineering, exploratory data analysis (EDA), and statistical analysis**, generating predictive insights to support logistics planning and operational decision-making.
- **Built** and evaluated **Linear Regression, Logistic Regression, Decision Tree, and Random Forest models** using **Scikit-learn**, comparing **model performance** through appropriate **evaluation metrics** to identify the most effective predictive solution.
- **Designed** interactive **role-based Power BI dashboards** for administrators, drivers and customers featuring KPI monitoring, shipment tracking, operational analytics, and decision-support reporting.
- **Automated** intelligent alert generation for shipment exceptions and high-risk deliveries, reducing manual monitoring efforts and enabling proactive logistics management.

Projects

V Connect: AI-Powered Rural Analytics & Decision Support Platform | Python, Pandas, NumPy, Power BI, SQL | May 2025

- **Processed**, cleaned, and transformed **650,000+** village-level records using **Python, Pandas, and SQL**, improving **data quality**, standardizing datasets, and reducing manual **preprocessing** effort by **70%**.
- Performed **Exploratory Data Analysis (EDA), statistical analysis, feature engineering**, and SQL-driven analytics to identify demographic, infrastructure, and socio-economic development **patterns** for **data-driven decision-making**.
- **Designed** scalable data processing **pipelines** to automate **data integration, validation, and reporting workflows**, significantly improving operational efficiency.
- **Developed** interactive Power BI dashboards featuring **KPI monitoring, drill-down analysis, regional comparisons, and dynamic** filtering to support administrative planning and executive decision-making.

CyberForge: Intelligent Knowledge Retrieval System | Python, Pandas, Flask, SQLite, JavaScript | June 2026

- **Developed** an intelligent **knowledge retrieval system** capable of **processing user queries** against a structured knowledge base containing 150+ responses and 500+ indexed keywords per entry.
- **Designed** a custom relevance **scoring algorithm** using keyword weighting and similarity **ranking techniques** to retrieve the highest-ranked response in real time.
- **Implemented** multilingual voice and text interaction with intelligent autocomplete, improving **accessibility** and user experience.
- **Built** a modular Flask application with SQLite for scalable **knowledge management**, optimized **query processing**, and efficient response retrieval.

Education

Master of Computer Applications

Jul 2024 – Apr 2026

[Measi Institute of Information Technology](#)

Bachelor of Commerce

Aug 2021 – May 2024

[The New College](#)

Achievements

- **1st Place** — Intra-College Hackathon, MEASI Institute of Information Technology (2025)
- **2nd Place** — Inter-College Hackathon, MGR University – Department of Information Technology (2025)
- **Solved 1,750+ coding problems** on LeetCode, strengthening algorithmic thinking and problem-solving skills.
